José Ángel Carretero Montes

Computer Engineering & Business Administration | Data Science

joseangelcarretero.dev joseangelcarretero300@gmail.com LinkedIn 0xjoseangel X

PROFILE

Fifth-year student of the double degree in Computer Engineering (Computation and Intelligent Systems) and Business Administration at the University of Granada. Specialized in Data Science and artificial intelligence algorithms, with experience in full-stack development, infrastructure automation, and distributed systems. Focused on applying analytical models and machine learning techniques in finance and business.

TECHNICAL SKILLS

Languages: C++, C, Python, Java, JavaScript, Ruby, Bash
Frameworks: Django, React, Vite
Infrastructure: Docker, Ansible, Linux, Git, Oracle
Data Science: Jupyter, Pandas, NumPy, Matplotlib

EDUCATION

Double Degree in Computer Engineering + Business Administration 2022 – Present
University of Granada
Specialization in Computation and Intelligent Systems

LANGUAGES

English — C1 (Aptis ESOL, British Council, 2026; Speaking & Writing B2) Verify
Spanish — Native

PROJECTS

Casino Online GitHub
JavaScript, React, Django, Python, Oracle
Online casino platform with a headless architecture. Django backend with an Oracle database and a React + Vite frontend. Includes user management, game catalog, transaction system, tournaments, and session control.

Danger Theory — Financial Crisis Detection GitHub
Python, Jupyter, Data Science
Application of Danger Theory to detect currency crises using evolutionary algorithms inspired by biological immunology. Includes an academic paper, an interactive book, and an economic data analysis pipeline.

Reactive and Deliberative Agents GitHub
C++, Artificial Intelligence
Implementation of intelligent agents with reactive and deliberative behavior for autonomous navigation in simulated environments. Development of the agents' decision-making and planning logic.
